

POLITICS GROW HOT IN IDAHO

Senatorial Nomination Holds
Center of Stage as Time

(By Associated Press)
BOISE, Idaho, Aug. 17.—Nomina-

the November elections are to be

year will be between the democratic
and republican candidates for the
senatorship. United States Senator
William E. Borah may campaign for
the republican candidate.

A secondary fight in republican
circles involves renomination of

the house of representatives.

LONGSHOREMEN GET HIGHTONED

Pain, Wholesome Food Fails to
Satisfy Them—Now They
Want the "Trimnings"

(By Associated Press)
SAN FRANCISCO, Cal., Aug. 17.—
Trimnings, such as chicken salad
and cream puffs, are wanted by the
stevedores of the Matson Steamship
company on the bill of fare of the
cafeteria at the Matson club, operat-
ing on the company's docks here for
the employees.

When the cafeteria opened, "solid
food" was offered at cost. This, it
was believed, was what the work-
men wanted. The stevedores on the
board of directors, however, put
through a motion ordering the trim-
mings be added.

"Plain, wholesome food for steve-
dors" one of them said. "Sure,
but a fellow wants some of the fancy
trimmings when he has the money to
pay for them."

The club, which was established to
replace the hospitality of the water-
front saloon, also has ordered a bill-
board table and has subscribed to
what several of its members describ-
ed as "highbrow" magazines.

Occident Divide Company Will Start Development Work Soon

The first effect on the rest of the
district of the sensational rise in
West Divide stock was seen today,
when R. S. Wilbur, president of the
Occident Divide Mining company,
announced that his company had
decided to place on the market 100,000
shares of treasury stock. The stock
will be sold at six cents a share, ac-
cording to Mr. Wilbur.

This is the first serious attempt
to float a company in the district
aside from the West Divide, and,
with the interest that is being taken
in the newest boom silver field, it
is considered an important moment.
The Occident group is developed by
a 20-foot shaft and 200 feet south
of the shaft, two tunnels 30 feet
apart that are driven into the out-
crop of the vein. The shaft, which is
inclined, cuts the top of an ore shoot
at a depth of 20 feet. At the 20-foot
point there is exposed for a length of
four feet an 18-inch seam that as-
says 30 to 120 ounces silver, but for
an unknown reason this shoot was
not prospected by the company that
sunk the shaft.
